

A Paired stromal expression of fibroblast-associated programs

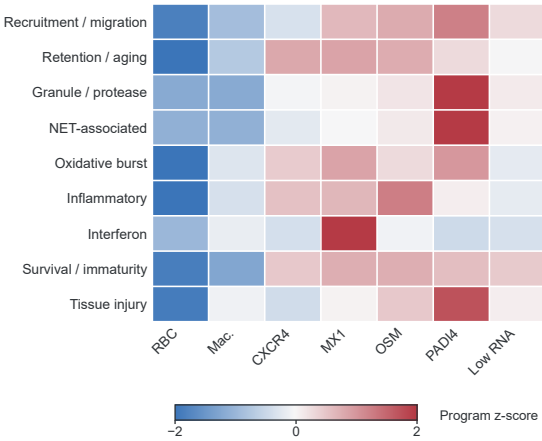

Matched noninflamed and inflamed UC tissue; 14 patients

Paired Wilcoxon q (BH, 8 programs). Lines: patients; bars: medians; open points: <10 recovered cells.

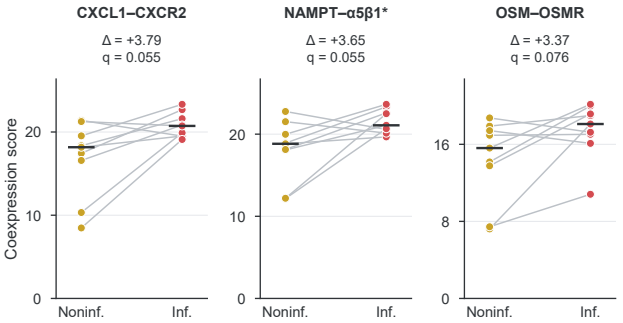

B Pooled RNA programs and annotation controls

All conditions; original gene modules

C Paired ligand-receptor coexpression

9 matched UC patient pairs

Paired Wilcoxon q (BH, 5 original routes).

*Receptor summary: min(ITGA5, ITGB1).

Δ : median paired change; lines: patients.
